

NEWSLETTER

4th April 2010

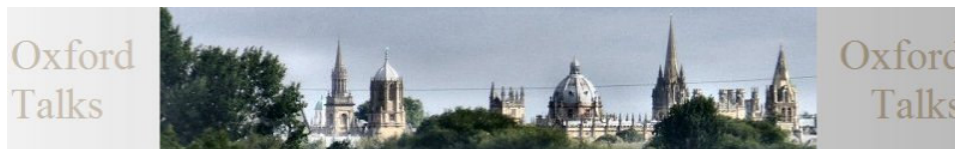

Any thoughts expressed by me in this newsletter are my personal views - unless otherwise stated, or implied.

All links and articles are provided for your personal consideration and do not indicate my agreement with, or support for, all of the material they present.

Hi everyone,

I know... another pdf newsletter, for now; though one subscriber has written to say that they prefer it I have reservations using it without a better mailing system. (I've had to send out several individual copies to subscribers who didn't receive the last one...not to mention the linking probs.

Thank you to the many of you that wrote offering to pay for the newsletter, in some cases far more than I suggested. I really am greatly inspired by your kindness as well as your encouragement. I still have other personal priorities at the moment so I haven't been able to do anything about the new mailing system but I will because it offers a greater security as well as efficiency. I reckon that considering the response I'll be able to reduce the individual cost that I suggested (£1 a month) too but I'll let you know more when I've done the sums.

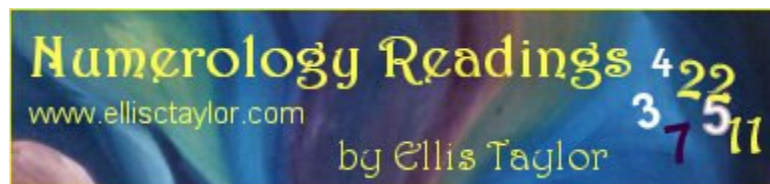

www.oxfordtalks.com

Oxford Talks

Oxford Talks are recommencing. They will begin with fortnightly or monthly meetings depending upon the interest and turnout. I am aiming at larger conferences later down the track and already have a brilliant venue lined up for them - to go with the terrific speakers that I have in mind.

The first meeting will be at the St Giles Café in St. Giles Oxford on Thursday 22nd April at 7pm. This will be mainly a get together and discussion where attendees will be able to meet other interested parties and perhaps offer ideas etc for future events. It's a small venue so please email me if you intend coming. As numbers grow we will move to a bigger venue that has already been negotiated.

www.onthelinenumerology.com

Questions I've been asked:

Occasionally I've been asked questions about matters that I have rarely addressed in my articles. I thought the questions and answers might be of interest to some subscribers and so I propose to include them in these newsletters.

Q: From my recollection you have never mentioned Exopolitics in your work. Do you have a reason for this? What is your view of Exopolitics?

A: I probably have mentioned it somewhere but it would likely have been in passing. Firstly, some readers may not know what 'Exopolitics' is. It is described by the movement itself, on its website as: "... *the study of the key individuals, political institutions and processes associated with extraterrestrial life.*"

Source: www.exopolitics.org

Personally I have another word for it: **Exobolloxits**. It's rather rude and childish I know but it is based on what I hear (rather than what I'm told) about the motives for this organisation - between the words.

What I am told is that visiting entities from *out there* need informed human representatives *down here* to liaise with when they finally front up to the people of Earth: Credentialed people who can help the visitors to communicate *their* message to humans and humanity's message to *them*.

What I hear (in the noise) is that they are intently setting up another damned hierarchy at best and a bunch of 'V' quislings and collaborators at worst.

What I see overwhelming the number of good well-meaning people who innocently groom this Trojan Horse with words are very persuasive top-table scramblers: preening egos and confounded dupes of an insatiably destructive consciousness unrivalled in the arts of illusion and delusion. These polished dark mirrors, 'torquing heads', sound very good, very credible, and they always make the right noises when they are poked in the right places but perfect your natural human ability to read auras and you'll see things differently; meanwhile, and as well, watch the body language. Strange signs and hand signals, dress, eye movements and body stance betray their motivations and motivators. Pay attention.

As many of you know I am not speaking from an intellectual, book-reading, YouTube-watching desk chair I'm talking from a lifetime (lifetimes) of conscious and subconscious contact with human and non-human entities. My perception of the situations that the wonder-full human species is currently wrestling with is coloured by my access to, and experience of, several points of view but I know that doesn't make me right. It is however what I feel and understand to be true at this point in my education.

The entities that I have met have no difficulty traversing the dimensions of time and space both physically and mentally. What use would they have for the 'politicians of XO', Exopoliticians? None whatsoever. The beings with something benign to share with us communicate telepathically with unfettered ease so in a blink can gauge the thoughts and perceptions of everyone...and for that matter so too do the psychopathic entities that are feted, praised and encouraged in our world.

Our experiential world will change from the pit to paradise when the consciousness of humanity rises to the point where humanity's prevailing motivation is one of care, love and respect for all others. No one else can, or will, do that for us but we can encourage each other and we can keep on doing that.

What is my view of Exopolitics? Exopolitics is a *Darkly* motivated ploy that entirely aligns with the currently cast 2012 Megaspell (www.ellisctaylor.com/2012megaspell.html) that aims to send us, and all of Creation, careering back into the abyss. It is being 'manned' by 8-frequency and it will do us all good to reflect on these words from Albert Einstein:

"Problems cannot be solved by the same level of thinking that created them."

The below was sent in by F:

Hi folks,

Once again, here are some notes I made from the latest, 61-page, Web Bot analysis of future trends. (Guess you all know by now that this is based on the fact that we all precognate the future (even if not consciously) and reflect that in our emotional language and/or undertones to our language.)

I have attached the whole report if anyone wants to trawl through it. There's a load more but I was just too tired to keep going on my extractions! I also left out the info on the US as this e-mail is mainly going to folk in the UK. If you wish to find out the data info for USA, there is masses of it in the report and, of course, what happens there does affect the rest of the globe in various ways.

The report could be seen as grim reading in places but all these potential and actual events fit the prophesied pattern of the collapse of one way of living, which has to happen before a new paradigm can be firmly installed. Of course, the way it all happens is not so clear cut as systems crumble and those in power ramp up their control in desperation alongside the growth of awakened minds and the pioneer work of individuals and groups to step outside the box and establish the new paradigm.

Love,

F

Notes on Web Bot Report 12 March 2010.

Interpretations and Predictions for 2010/2011.

TPTB = The Powers That Be – referring not only to our visible governments and subsidiary authority bodies but more particularly to the hidden cabal (not so hidden now) who use power in secrecy.

Brief overview.

The crisis descriptors are more widespread and some are longer term, across all categories. July shows up in most categories as being a 'turning point' or a 'marker' of increased activity thereafter.

The planet itself is not at risk from any events, in 2012 or beyond, but civilization is at risk. Systems crumbling. There is still a data (thus communications) gap between March 2012 to end of May 2013.

Sometimes 'tipping points' appear. Times when the emotional reaction is high and global.

Largest ever was around 9/11. It was 8 hours duration and the release language (time taken for folk to get some grip on the emotion of it) was just over a week in duration. In this report a tipping point of 4 days shows up: from 7.20pm (pacific coast time) on 8 November to 11.49 pm on 11 November. The release language stretches over 3 months, until 23 Jan 2011. Very extreme. Something big going to happen???

The other 'tipping point' that showed in past data was around the 2004 tsunami.

I left out the mass of data relating solely to USA, although it is relevant because what happens there has a knock-on effect. I've quoted on para at end.

Society.

Reverse migrations. Immigrants return to country of origin. Social pressures put on illegal immigrants. This becomes visible late spring and swells to a trend over summer.

Revenge shows up, towards politicians, bankers / cabal and media. Riots, first in USA, then spreading to other countries. Quote: "*The riots at the global level will be used to propel the visibility of corporate fascism, through the use of shock troops. This particular tactic on the part of the corporate masters will have some very interesting (but unanticipated) consequences. More on this will become visible in late fall, 2010, just as the 'tipping point' is reached.*"

Depression on a global scale indicated to act as a trigger to completely new forms of social arrangement. Early signs of new social organizations will be visible in some of the successes of the SOCs (self organizing collectives)

Data sets indicate anti-religion aggressive acts starting, or becoming visible, late October 2010.

Quote: *“Much of the trouble for the religions will be coming from a new knowledge base that points to faith-based religions (Judaism, Christism, Mohammadism) as being controlled by a solar cult. First noticed in Europe but rapidly spreading planet wide.”*

Data sets indicate widespread arrests of clerics/priests; trials, convictions and even re-education. Looting of Vatican that was forecast a few years back is still in linguistics, as is deaths in ‘Vatican sorcerers place’. Long-suppressed knowledge will be found in Vatican archives.

An Irish woman of passion, connected to a dead Frenchman, will come to the fire during unemployment riots.

Revolution, riots, social dysfunction, control system energetic destruction.

Quote: *“Further problems are seen for China, France, Italy and Britain as a result of the manifestation of revolution behaviour following July 8th, including bloody and violent riots. Some of the increased emotional tension values for these countries will come from the 2012 documents material that leaks out over spring. These leaked secret materials are shown as propelling or participating in the paradigm shift that is even now starting to affect planetary omnihumanity..... The whole of the aspect/attribute supporting sets for this area go to the idea that the, too poor to count, group of persons in the underclass of the planet will be very intensely affected by the leaked 2012 revelations. That this underclass, on a planetary scale, is composed of 3 BILLION humans is forecast to cause TPTB great consternation.”*

Economic. Bank shut downs/lock-ups from early summer. From late spring wave of bankruptcies shifts to global corporations. Shipping goes idle. Massive levels of property damage due to weather conditions will drain insurance industry globally.

Global markets split into geographic regions due to climate crises.

80+% of all US wealth concentrated into less than 1% of population.

Capitalism, as a concept, will be seen to be negative (predatory). This shift of perception is global. This money paradigm shift develops over a few years.

Data shows organized assaults on bankers/banks.

Unemployment rage globally, expressed in riots which spill over into a global political crisis. Unemployment data also linked to shadow government, in such a way as to turn thousands of former sub contractors into whistle blowers.

Economic war between churches and governments. Churches subject to govt auditors and taxes. Data associated with this shows links to ETs and also shock of populace that has associations out to 4 generations, plus descriptor sets that are cross-linked to NASA.

Firms producing personal radiation equipment will have a short-lived boom from late summer onward.

Hyperinflation across northern hemisphere from summer.

Health care corporations / systems may be bankrupt. Data shows this happening in less than 3 weeks. Most of initial action in US but will affect all sectors of health care delivery across planets.

Food. Crop failures at levels never before reported. Higher prices. Competition for lower cost foods escalates.

Worst year for food production in the northern hemisphere.

People dying – starving – no money.

Food, as a commodity, will obtain new status in many places.

Only positive values / data around food are linked to SOCs producing food. They will be treasured as assets as precious as their produce.

Climate / Earth Changes 7 large, damaging earthquakes within data sets for 2010. Recent one in Chile is first. Indicated to span over year, punctuated by 2 large water events. Several instances of volcanic activity in which land forms are changed and also in which human populations have to relocate.

Decrease in property wealth due to earthquake damage.

Oceans are described as “*being unlike – not as before.*” Indicated to show up in fall 2010. “*The data sets go to the idea that oceanic convection currents will shut down across the planet and thus will trigger similar levels of changes in the atmospheric currents.*”

Data indicates a winter that will go down in history as being brutal after a wild and unpredictable autumn. Language includes energy shortages.

Tidal height problems affect loading and offloading of some ships in some ports.

A large release of blue ice undersea methane causes problems with shipping and other transport on and around the affected area. Somehow involves TPTB in trying to explain it away.

Summer event of mainstream coverage of problems at South Pole. Language in use is: “*being shocking to the sleeping sheeple*”. Data indicates a large shift or turn-around in mainstream media propaganda terminology relating to climate change, closing in on real conditions.

Some of the southern pole problems are indicated to be associated with solar activity. Current changes in southern oceans are driven by solar magnetic activity and the current changes and their climatic effects will start to become visible by summer. Again, these climate changes will lower food production.

Earthquakes and rising lands in Antarctica.

Large scale changes in ocean floor contours will pose problems for shipping. Probs for military subs. Coastal flooding due to tidal actions / ocean levels. Flooding of low lands from rain.

Ferry problems indicated to be a global phenomenon in 2010.

Descriptor set for 2 huge hurricanes / typhoons over late summer/early Fall. Indicated to cover huge areas. Record-breaking amounts of water will flood entire regions to greater depths than previously recorded.

Data forecasts atmosphere holes and bizarre atmospheric phenomena. Atmosphere problems have negative impact on food crops. Also cause heat stroke in humans and skin degradation due to solar radiation.

Atmospheric waves or ripples or tunnels will cause out of season storms, much in northern hemisphere. Again linked to crops / food shortage.

“The data is forecasting extraordinary size and strength storms that will be bringing 20 years worth of rain in mere hours in some northern hemisphere locations.”

Sun disease strong in linguistics. Sun disease intense and will lead storms.

“Descriptor sets are forecasting a situation in which sun disease anomalies will power or propel some very radical behaviour changes within the social order over 2010.”

“Note that even the Terra entity (planet) has a change of paradigm sub set which is focused on the mind set perception consensus of planetary omnihumanity. The idea being that the commonly held consensus of omnihumanity about planet earth and its immediate future, change in a radical way as a result of the pending events of 2010. The change of paradigm (common consensus view of reality) is a very well supported linguistic set with very high levels of emotional values, indicating that the change of mindset itself will drive both short and long term changes in planetary humanity behaviour.”

ETs. Data indicates that substantial changes within planetary environment exposes an under ocean UFO base.

Strong data sets that we have space-going military who are engaged in fighting offworlders around our planet. This is partially disguised from us by the chem trails. Some huge tragedy occurs that leads to a ceremony in a warship (ships) that honours those who died and includes amputees and many badly wounded. First such ceremony for humans. Release of collective grieving. Violent action was a result of bad luck and bad timing *“as a result of the formation parameters that were placed upon the army in space by the critical king at the time of its inception.”* The key officer in charge will choose to retire as he will age overnight due to narrowness of averting a calamity and the horrific cost of doing so. Debris from this battle will fall to earth.

A rash and foolish admission (drunken slip of speech) from senior NASA staff will be captured on video and spread globally. This drunken admission will be taken so seriously that it will contribute to the revolution and will be THE most significant step towards disclosure.

There are some small data sets describing a reporter who will ‘just happen’ to go a booth in a restaurant and there discover some documentary material that, quite literally, causes fainting.

Data sets indicate large scale life forms that travel in space and are water based with large grasping extrusions.

Alien wars sub set grows over fall of 2010 and overtakes planetary human consciousness data from 23 Jan 2011 onward.

Debris from space battles falls to earth.

TPTB Linked to economy data (hunt for taxable assets) is discovery of a hoard of 2012 documents, 2012-related military documents and 2012 artifacts.

Cross-linked to sun disease sub sets is data indicating odd national behaviour on oceans. Govts merge their naval operations in to some massive and mysterious fleet operations. (N.B. This follows on from reported assembling of international fleet in Gulf of Aden last month.) Large-scale, never-seen-before levels of international marine /military activity. Data indicates that substantial changes within planetary environment exposes an under ocean UFO base.

Revolution is THE fear of TPTB.

Several royals die within a short period of time. “Confusion and fear among the monarchists will be visible to those who care to look.” Clif High says as an aside; “Note when priests are involved.”

Strong data sets indicating new findings of extremely old knowledge in late summer or early fall. TPTB will observe some events occur that will relate to deep human past and that will be unstoppable in its release to the general public consciousness. This relates to ETs and is indicated to set off the solidification of the paradigm change. Might be about alien wars.

Quote: *“The idea here in the detail layers is that this information changes minds almost instantly once it is accepted. Further, this information will alter the fundamental view of women and their position in the universe. The information is crucial and practical to effecting a personal enlightenment experience that propels radical and swift personal change.”*

One group of awakened people will prove to be a problem for TPTB.

USA

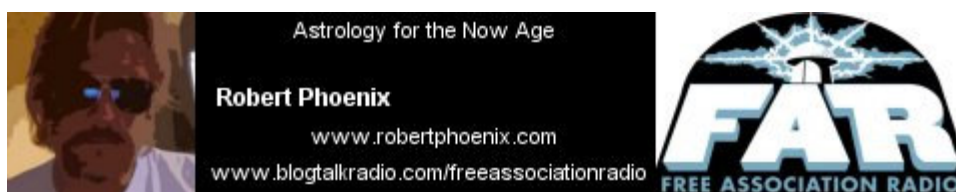

Quote from Report:

As the year progresses, an increasingly visible level of panic will be observable on the faces presented by the media to provide public discourse on the subject of unemployment. Noting that the USA will not be alone in this trend, the panic on the faces of the politicians will not be a good sign. The data sets indicate that in spring at least 2 incidents of panic sweats by politicians will be caught on video and be alternative media fodder for weeks. The panic sweats will be most embarrassing for the female minion politician and her staff due to the change in speech that is prompted. The panic visible in politicians will escalate over summer and fall and will include some faux pas / bad words on the part of a ranking general in the USA. This will be a very, very, very important temporal marker for the aware observer. Following this visible marker of bad words, significant displacements can be expected to begin occurring for large parts of the populace of USA due to several manifesting circumstances. If ever there was a need for a ‘bug out bag, the days following this temporal marker will be it.

Protect Yourself as States Implode – 2nd April 2010

The world is breathing a sigh of relief now that the financial crisis in Greece is “over.” Yeah, right. Greece’s financial misdeeds — the country has racked up a lot of debts it can’t pay — will probably come back to haunt Europe, and soon.

But we in America shouldn’t be too smug, because U.S. states have their own money problems, many of them worse than anything facing Greece — and the problems at home are starting to erupt!

In fact, there are steps you might want to take RIGHT NOW to protect yourself from the financial earthquakes these debt volcanoes could unleash.
